

SECURITY ALERT

It has come to our attention that some members of the AGTA and ICA have received phone calls from a man claiming to be stuck in Dubai, needing assistance to get to Pakistan and is requesting personal information such as passport numbers, Patriot Act information, bank account numbers, etc. He can be very convincing and persuasive. Please be aware that this is a scam to get your personal information. Do not release any information to him. In general, it is a good safety guideline to never give any of this information out over the phone or by email unless it's specifically to someone you know or do business with.
